

GN 2100 D Series Direct Connect

Next-generation professional headsets

For Telephone systems equipped with headset ports our direct connect headsets provide the sound quality you expect from GN Netcom without the need for an amplifier. Our exclusive PureVox technology, provides microphone amplification to ensure great sound on the other end of the phone. Why do we call the GN 2100 D Series "the next generation" of professional headsets? Just look at the GN 2100 D. We've taken the most advanced technology and matched it with a sleek, lightweight design—for a combination of clarity, comfort and convenience that's really a breed apart. If you prefer an on-the-ear model, the GN 2100 D is also available with our patented SureFit® flexible earhook.

The GN 2100 family of direct connect products offers a variety of wearing styles and boom options to accommodate every user preference and operating environment including monaural or binaural, over-the-head or on-the-ear and Sound Tube and Noise Cancelling boom.

GN 2110 ST D
