

GN 9120 LR – Wireless Headset for the Office

GN 9120 LR
Shown with charging base
and wireless headset.

100 Feet of Pure Freedom

- 100' (30m) range to work your way
- Up to 4 hours of talk time for calling convenience
- Digital 2.4 GHz transmissions for superior sound quality
- Sleek and lightweight for easy-to-wear comfort
- Two wearing styles (over-head and on-ear) for personalized comfort
- Multi-layered security system for secure conversations
- Works with most corded telephones (including multi-line PBX)

With the GN 9120 LR, GN Netcom has succeeded in cutting the cord, and the price, without cutting back on the features that are important to you. Giving you the wireless freedom you need, and the superior sound quality you demand—at a price you won't find anywhere else.

Local reach. And lots of talk time.

The lightweight, comfortable GN 9120 LR lets you move freely while you're on the phone, anywhere in a 100-foot radius. That's over 30,000 square feet of untethered freedom! And fully-charged, the GN 9120 LR will let you talk for up to 4 full hours before recharging. Of course, if you return the headset to the base when you're not on the phone, the GN 9120 LR will always be charged and ready.

Free to be more productive. And more comfortable.

Your office phone has been holding you back. But the GN 9120 LR sets you free. To take calls while keeping both hands free. Or get up and get answers your callers need, without hanging up. Without ever crunching the phone between your neck and shoulder.

Your calls are safe. And sound great.

With the GN 9120 LR, you're not sacrificing anything to get all this freedom. Multiple security layers keep your calls private. While the GN 9120 LR's digital 2.4 GHz technology delivers clear, natural sound quality, no matter how far you go.

The GN 9120 LR is only available for a limited time, so contact your GN Netcom reseller now to take advantage of this unique offering!

Freedom) Sound Quality) Comfort)
